## Health Supplement & Vitamin Fortification

## Existing & New Formulations

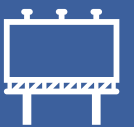

## Complementary Medicine

## Vitamin Fortification

Vitamin fortification is one of MJ Labs' main facets and include new and existing formulations for both national and international enterprises.

MJ Labs is an accredited and certified vitamin fortification premix manufacturer, specialising in food schemes.

## Production

MJ Labs adheres to good manufacturing practice (GMP) which ensures that the products are produced at the highest possible standards and quality.

By combining high quality equipment with high quality materials and given the great deal of experience we can provide clients with the excellence they require.

# MANUFACTURING & PACKAGING

## Manufacturing of:

Capsules

Tablets

Powders

Creams & Ointments

Liquids

Sachets

Effervescent Tablets

## Packaging in:

Plastic Containers

Glass Containers

Blister Packs

Sachets

Tubes

# PRODUCTS

## Powders

*MJ Labs is one of the few manufacturers in South Africa that manufacture fortification premixes and health supplements in power form.*

## Blister Packs

*Capsules can be sealed into blister packs before they are boxed with ease.*

## Capsules

- *Bovine Gelatine Capsules*
- *Veggie Capsules*
- *Size 0 - 00*
- *Different colours to choose from*
- *Soft gel packing*

## Effervescent Tablets

*Effervescent tablets hit the market with a big fizz! Effervescent tablets are produced, tubed (10's or 12's) and boxed to perfection. Dehumidifiers form part of the quality system.*

## Liquids & Drops

*Looking to bottle any liquid supplement? We have the right container, whether it is glass or plastic, with an attachment to dispense products with ease.*

## Sachets

*When it comes to convenience on the run, sachets are the way to go. MJ Labs has stick-fill sachet manufacturing machines.*

## Tablets

- *Film coated tablets*
- *Uncoated tablets*
- *Different colors to choose from for film coating*

## Binded Packs

*If you are looking to sell a combo pack of your products. We can manufacture your products and create binded packs the way that you prefer them.*

## PRODUCT CAPABILITIES

Capsules – 600 000 capsules per day

Effervescent tablets: 30 000 (3000 tubes)

Powders: 100 kg per batch

Creams: 100 kg per batch

Liquids: 100 liter per batch

# NEW PRODUCT DEVELOPMENT

If you have an exciting new product idea you would like to develop, our experienced team would be happy to assist with research and formulation development. Please note that fees apply based on the progression of the formulation. Our R&D team will assist with trials and samples of your product. Once prototypes have been tested and approved, production planning can commence.

If you have existing products and only need to manufacture, we can provide you with samples based on approved preliminary costings.

Before any product development or costing on existing products a non-disclosure agreement is necessary. This outlines your formulations' confidential information, typically for the protection of your product. We also have technical quality agreements to assure the quality of the product.

# YOUR JOURNEY TO SUCCESS

**01**

Complete client information form and sign NDA.

**02**

Confirmation on formulation, application and packaging details in order to provide a preliminary costing.

**03**

Upon approval of preliminary costing, TRIAL 1 of sampling phase commence.

**4.1**

Sampling phase.

**4.2**

Amendments to formulation and packaging until target price approval.

**05**

Upon approval of sample, final costing can be sent, and quotation can be signed off.

**06**

We can assist with label content, but PIL/PI must be done via a regulatory consultant.

**07**

Upon artwork approval, orders can be placed. Please keep label printing MOQ and lead time in mind when placing an order.

**08**

Once sales order is sent, we need a 50% payment to secure your order and balance payment before collection can be made. Credit application can be done after the first 3 orders.

**09**

Once all raw material have been procured and packaging items have been delivered, manufacturing can start.

**10**

First batch lead time on new products is 15-20 working days. Second batch lead time is 10-15 working days.
